

Institutional Distinctiveness

Practical learning experience is a process of learning by doing. It lays emphasis on engaging the students in hands-on - experiences and reflection which enables them to connect theories and knowledge learned in the classroom to the real world situations. The teacher educators of the institution makes every effort to involve the students in practical work. The students were trained in laboratory work to experience the psychological theories. Field work were assigned to them for making reports in educational issues and challenges. Regular workshops and seminars were organised for all the teachers and students of the institution. More emphasis was given on ICT use by the students. There was a rise in community services to enhance the opportunity to collaborate with diverse organisation and people. Apart from curricular aspects and value based services, emphasis was given on the co curricular aspect also to truly make the holistic development of the students. Practical learning experiences not only increased students learning efficiency but also build in them self confidence and leadership skills .
